# My 3 "Love at first sight" artists from Cube Art Fair

[Brussels \(/?category=Brussels\)](#), [Art \(/?category=Art\)](#)

Brussels is a small city with a lot of potential. The extreme multiculturalism, the presence of the european institutions, the millions of influences from all around the world he brand new museum inspired by the New York's MoMa and Paris Pompidou) and Brussels is investing like never before in becoming a reference in the exposition and trading

I'm not an art expert, but as a very enthusiast art lover these are my three "love at first sight" artists from this amazing exposition.

Jonas Leriche - Luxury Overload

(<http://www.leriche.be/fine-art/>)

This Italo-American artist (yes, I will stress the Italian blood part because I need a moment of patriotic pride) is freedom of expression embodied. His work unifies abstract to : artwork. The concept behind the painting isn't handed ready-to-eat to the viewer, but is the viewer itself that extract and creates the meaning. [Conticelli](https://www.paulchr.com) (<https://www.paulchr.com>) canvas, and if decides to acquire the art piece, the full poem is revealed a way of create an even closer relationship between the collector and the artist. What I love about abs other.
